

**Simultaneous Translation** — Digital translation systems transmitting excellent voice quality and our custom-made oak interpretation booths contribute to the success of international meetings.

**Bidouille** — Portable simultaneous translation system that does not need interpretation booths and can be used during small meetings and guided tours.

**Interpreters** — Playing an essential role in guaranteeing the success of an international event, CP Centro Pilota only engages interpreters that are members of Professional Associations.

**Sound Systems** — Digital mixers & high quality equipment coupled with the expertise of technicians enables CP Centro Pilota to fulfill the most diverse needs of events and conferences.

**Audio Taping** — Events are recorded in MP3 files that can also be sent via the Internet for immediate playback, transcription or translation.

**Video projection** — Aware that audiovisual technology is a fundamental element for any conference or meeting, CP Centro Pilota offers projectors that are suitable for the meeting size and the event's needs.

**HD Video conference** — The ideal way to have people from different locations participate in a meeting without the need of travelling. We also offer interpreting services via video conferencing.

**Audio conference** — A professional audio connection that allows three or more people to communicate using any wired or mobile telephone. Audio taping also available.

**Filming & CCTV Services:**

- I-Mag (Image Magnification) shows the speaker on large projection screens or plasma monitors.
- Filming medical surgeries or other events for live viewing from the conference hall, via video conference or CCTV.
- Video streaming with PowerPoint integration for live or on demand viewing.
- Digital video recording and post production.

**Video Streaming:**

- **Streaming Live:** a conference can be viewed directly from your own PC, tablet, or mobile phone from anywhere in the world.
- **Streaming on Demand:** audio visual content can be stored on the server and then accessed after a request has been sent.

**Staging** — Standard *Pipe-and-Drape* sets or customized staging and backdrops are used to "set the stage" for your event.

**Lighting** — Lighting elements are tailored for each event's needs, from basic "stage wash and lectern" to more complex programmable moving light shows.

**Technical Support** — With nine permanent staff members, CP Centro Pilota assures highly qualified technicians that have many years of experience and that also pay attention to their demeanor and attire.

**Audience Response Systems** — Used to create interactivity between a presenter and the audience in any meeting or conference.

**iPad, Laptop, Printer, Fax and Copier Rental** — Used

for conference offices, speaker ready rooms, press rooms, or as video sources for content playback through VGA, DVI, HDMI or wireless connections to video projectors.

**Video Conference Rooms** —

The two video conferencing facilities permanently installed at our offices are ideal for individuals and small groups who need to communicate in a clean, efficient and air-conditioned environment. CP Centro Pilota is partner with various video conference room brokers worldwide.

**Project Management** — With over 40 years of business in more than 90 conference locations in Rome, CP can confidently and effortlessly assist clients in selecting the most appropriate venue, services and equipment to reach their event's goals.

**Hostesses & Stewards** — Rigorous selections are made to offer multilingual professional personnel for conferences and events. Their standard attire can be customized by the client to recall company colors with foulards or ties.

**Translations** — Scrupulous attention is given to selecting the appropriate team of mother tongue freelance translators to ensure accurate translations.

**Transcriptions** — Transcriptions can be performed in Italian, English, French, Spanish and German live during a meeting, once it is over, locally in the conference hall or remotely in our offices.
